
2001 Kentucky Annual Hospital Utilization and Services Report

*January 1 through
December 31, 2001*

Revised August 2002

Health Policy Development Branch
Division of Epidemiology and Health Planning
Department for Public Health
Cabinet for Health Services

2001 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT

INTRODUCTION

Thank you for your interest in the **2001 Annual Hospital Utilization and Services Report**. This report covers the utilization and services activities of licensed Kentucky hospitals for the calendar year, January 1 through December 31.

The report is divided into four sections:

- ◆ **Hospital Utilization & Services Decade Review**
- ◆ **Section I - Hospital Utilization Data by Licensed Bed Type**
- ◆ **Section II - Acute Bed Utilization**
- ◆ **Section III - Service Utilization**
- ◆ **Section IV - Inpatient Utilization Data of Medicare/Medicaid Patients**
- ◆ **Appendices-Definitions**

The Health Policy Development Branch produces a number of utilization and services reports, which can be obtained by contacting our office. In addition to the Annual Hospital Utilization and Services Report, the following reports are available: Long-Term Care Report; Home Health Services Report; Hospice Report; Magnetic Resonance Imaging Report; and the Ambulatory Surgical Services Report.

Questions or comments regarding the data contained in this report should be directed to Beth Sanderson at (502) 564-9592, ext. 3954 or e-mail: beth.sanderson@mail.state.ky.us

This report becomes the most recent official data on Hospital services utilization published by the Cabinet for Health Services. For additional copies of this report, please submit a request in writing along with a check in the amount of \$10 made payable to the Kentucky State Treasurer to:

Health Policy Development Branch
Department for Public Health
275 East Main Street HS1E-B
Frankfort, KY 40621

Printed with state funds.

*HOSPITAL UTILIZATION
SERVICES DECADE REVIEW*

Decade Review Notes 1992-2001

The Decade Review shows the following trends for acute and psychiatric licensed hospital beds from 1992 through 2001:

- ALOS in Kentucky for acute and psychiatric beds combined was 6.1 days in 1992 and declined to 4.9 days in 2001.
- The average occupancy rate decreased by .5% percent from 1992 (49.9%) to 2001 (49.4%). The following graph shows the occupancy dropped sharply from 1992 to 1995. It rose again in 1996 and another drop occurred in 1997. The occupancy rate steadily increased from 1998 to 2001.
- The total inpatient days have decreased from 1992 to 2001 by 260,234 days. In 1992 the total inpatient days were 3,173,365 and decreased to 2,913,131 in 2001.
- Several factors may have contributed to the changes over the decade: An increased use of outpatient procedures has reduced inpatient stays; Newer medical technology; Changes in reimbursement that sets limits on lengths of stay by certain procedures; and changes in insurance coverage.

It should be noted that data reported for the year 2001 shows that an increase occurred in each of the following categories: Admissions, Discharges, Occupancy and Inpatient Days.

It is particularly interesting to note that Psychiatric admission, discharges, occupancy and inpatient days increased significantly in 2001. Psychiatric admission including State Psychiatric hospitals increased from 38,815 in 2000 to 43,729 in 2001. That's an increase of 12.7%.

The Kentucky Acute and Psychiatric and the Psychiatric Decade reviews do not include data from the state psychiatric hospitals. This data was collected for the first time in 2000, but was not included in the decade review in order to be consistent with the data collected during the years 1991-1999. The 2001 Annual report tables one (1) & three (3) do contain state psychiatric hospital data.

Kentucky Acute and Psychiatric Hospitalizations 1992-2001

Year	Admissions	Discharges	ALOS	Occupancy	Inpatient Days
1992	523,731	524,513	6.1	49.9%	3,173,365
1993	531,883	531,073	6.0	49.6%	3,158,558
1994	522,130	522,771	5.7	46.8%	2,983,058
1995	524,647	527,653	5.3	44.1%	2,794,928
1996	537,596	531,575	5.2	46.8%	2,786,470
1997	535,354	534,178	5.0	45.6%	2,682,189
1998	539,070	536,317	4.9	45.4%	2,672,388
1999	542,255	544,397	4.8	45.9%	2,693,001
2000	563,643	562,058	4.9	47.0%	2,766,147
2001	585,708	587,430	5.0	49.3%	2,903,774

Footnote: These charts do not include state psychiatric hospital utilization. See Decade Review Notes Section for further information.

SECTION I
UTILIZATION OF LICENSED
BEDS

2001 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT

SECTION I

UTILIZATION BY LICENSED BED TYPE

Combined **Acute and Psychiatric** inpatient utilization data are in **Table 1** as in previous reports. Since the Kentucky State Health Plan review criteria and standards consider acute nonpsychiatric and psychiatric beds separately, utilization of these beds is also shown separately, **Acute Nonpsychiatric** in **Table 2** and **Psychiatric** in **Table 3**. Utilization of **Swing Beds** by long-term care patients is shown in **Table 4**. Utilization data for long-term care beds is maintained in a separate report which is available from this office. **Chemical Dependency** and **Physical Rehabilitation** data are in **Tables 5 and 6**.

The following utilization indicators are shown: Licensed Beds, Beds in Operation, Total Admissions, Total Inpatient Days, Total Discharges, Total Discharge Days, Average Daily Census (ADC), Occupancy Percent, and Average Length of Stay (ALOS). Three of these measures - ADC, Occupancy Percent, and ALOS are the result of calculations. The formulae for calculating these indicators are:

Average Daily Census (ADC) = Total Inpatient Days / Days in the Reporting Period.

Occupancy Percent = [Total Inpatient Days / (Licensed Beds x Days in the reporting Period)]x 100. The occupancy percent is adjusted to account for bed changes during the reporting period.

Average Length of Stay (ALOS) = Total Discharge Days / Total Discharges.

Acute Nonpsychiatric Care, usually known simply as acute care, generally refers to those medical and/or surgical services provided for a period of time not to exceed thirty days. The higher the level of service - primary, secondary, or tertiary - the longer the patient may reside in a facility.

Psychiatric Care is provided in psychiatric hospitals or psychiatric units and encompasses a number of conditions. These conditions may require treatment beyond a thirty day period and, in some instances, require frequent follow-up care.

Chemical Dependency treatment service is a structured inpatient program providing medical, social, diagnostic, and treatment services to persons who suffer from illnesses related to the misuse or abuse of alcohol and other drugs. The setting of the service may be either in a general hospital itself or a facility devoted solely to providing chemical dependency services.

Comprehensive Physical Rehabilitation is the process of treating an individual who, through injury or disability, acquired or congenital, is in need of assistance for attainment of the maximum level of physical, educational, and vocational function.

Special note concerning swing beds: The swing bed program allows acute care hospitals in rural areas to utilize part of their beds for skilled nursing needs. Although these beds were established for, and are typically used for long-term care patients, they still have the potential of being used for acute care patients, and therefore are included in their hospital's total licensed acute care beds in this report. They are also included in the number of beds in operation. However, data in Tables 1-3 reflect utilization by acute and/or psychiatric patients only, i.e., occupancy percents are based on acute and/or psychiatric inpatient days (exclusive of long-term care inpatient days), divided by the respective total licensed bed days. Combined acute, psychiatric inpatient days (exclusive of long-term care inpatient days), divided by the respective total licensed bed days. Combined acute, psychiatric, and long term care occupancy may be obtained by dividing the sum of acute, psychiatric, and swing inpatient days by total licensed bed days.

SECTION II
ACUTE BED UTILIZATION

2001 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT

SECTION II

ACUTE BED UTILIZATION

This section shows the distribution of acute and intensive care beds by inpatient service provided. **Table 7** covers inpatient services and utilization of acute care beds. The major categories are Medical/Surgical, Obstetrics, and Other (non-classified) services. The category Other (non-classified) services includes neonatal Level II and III beds, intensive care beds, transitional care beds, telemetry beds, etc. Data in these tables should be used with care as some hospitals were unable to submit data that distinguished between categories.

Table 8 covers inpatient services and utilization of intensive care beds. The major divisions are ICU, CCU, and Burn Care. Other IC/Special Care beds are no longer included in these tables, since transitional care beds (special care, progressive care, step-down beds, etc.) are not recognized as a special category of intensive care beds. These beds are considered medical/surgical beds.

Table 9 shows the utilization of newborn bassinets and Level II and Level III neonatal care beds by facility.

Special Note: The utilization of intensive care beds and neonatal care beds is included in **Table 7**. The data shown are beds in operation and inpatient days. The ICU and CCU data in **Table 8** and the Neonatal data in **Table 9** represent a subset of the total acute care data presented in **Table 7**. Therefore, the bed and utilization data from these tables should not be added together to obtain data on the total of acute care beds.

SECTION III
SERVICE UTILIZATION

2001 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT

SECTION III

SERVICE UTILIZATION

This section covers the services that hospitals provide to their patients, from the availability of services to the use of specialized services. These tables display data on selected services such as surgical operations, heart surgery, cardiac catheterization, and CT scans.

APPENDIX

2001 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT
APPENDIX A - DEFINITIONS

Admissions: Number of patients, excluding newborns, accepted for inpatient service during the reporting period. Because of internal transfers, hospital admissions may be greater than total facility admissions.

Alcoholism/Chemical Dependency Outpatient Services: Hospital services for the medical care and/or rehabilitative treatment of outpatients for whom the primary diagnosis is alcoholism or other chemical dependency.

Ambulatory Surgical Services: Scheduled surgical services provided to patients who do not remain in the hospital overnight. The surgery may be performed in operating suites also used for inpatient surgery, specially designated surgical suites for ambulatory surgery, or procedure rooms within an ambulatory care facility.

Average Daily Census (ADC): Average number of inpatients, excluding newborns, receiving care each day during the reporting period. Derived by dividing the number of inpatient days by the number of days in the reporting period.

Average Length of Stay (ALOS): Average stay of inpatients during the reporting period. Derived by dividing the number of discharge days by the number of discharges.

Bassinets: Number of newborn infant bassinets set up and staffed for use at the end of the reporting period. Bassinets are not included in the bed total and do not include isolets or neonatal intensive care units, which are included under beds.

Beds: Number of beds, cribs, and pediatric and neonatal bassinets regularly maintained (set up and staffed for use) for inpatients during the reporting period; does not include bassinets for normal newborn infants.

Births: Total number of infants born in the hospital and accepted for service in a newborn infant bassinet during the reporting period; excludes stillbirths. Births do not include infants transferred from other institutions and are excluded from the admission and discharge figures.

Burn Care Unit: Provides care to severely burned patients that is of a more intensive nature than the usual acute nursing care provided in the medical and surgical units. Beds must be set up and staffed in a unit specifically designated for this purpose.

Cardiac Catheterization Laboratory: Facility for special diagnostic and therapeutic procedures necessary for the care of patients with cardiac conditions. Available procedures must include, but need not be limited to, introduction of a catheter into the interior of the heart by way of a vein or artery or by direct needle puncture.

Census: The actual number of inpatients receiving care on any given day during the reporting period; does not include newborns.

CT Scanner: Computed tomographic scanner for head and/or whole body scans.

Discharge Days: Sum of the Length of Stay (LOS) of those discharged during reporting period.

Emergency Department: Organized hospital facility for the provision of unscheduled outpatient services to patients whose conditions require immediate care. Must be staffed 24 hours a day.

Inpatient Days: Number of adult and pediatric days of care, excluding newborn days of care, rendered during the entire reporting period.

Intensive Care Unit (cardiac care only): Provides patient care of a more specialized nature than the usual medical and surgical care, on the basis of physicians' orders and approved nursing care plans. The unit is staffed with specially trained nursing personnel and contains monitoring and specialized support or treatment equipment for patients who, because of heart seizures, open-heart surgery, or other life threatening conditions, require intensified, comprehensive observation and care. May include myocardial infarction, pulmonary care, and heart transplant units. Beds must be set up and staffed in a unit or units specifically designated for this purpose.

Intensive Care Unit (mixed or other): Provides nursing care to adult and/or pediatric patients of a more intensive nature than the usual medical, surgical, pediatric, and/or psychiatric care on the basis of physicians' orders and approved nursing care plans. Included are medical-surgical acute, pediatric, and psychiatric (isolation) units. These units are staffed with specially trained nursing personnel and contain monitoring and specialized support equipment for patients who, because of shock, trauma, or life-threatening conditions, require intensified, comprehensive observation and care. These units may also include cardiac care when such services are not provided in a distinct cardiac care unit.

Megavoltage Radiation Therapy: The use of specialized equipment in the supervoltage and megavoltage (above one million volts) ranges for deep therapy treatment of cancer. This would include cobalt units, linear accelerators with or without electron beam therapy capability, betatrons, and Van de Graff machines.

Neonatal Intensive Care Unit: Provides care to newborn infants of a more intensive nature than the usual nursing care provided in newborn acute care units, on the basis of physicians' orders and approved nursing care plans. Beds must be set up and staffed in a unit specifically designated for this purpose.

Obstetrics Unit: Provides care to mothers following delivery, on the basis of physicians' orders and approved nursing care plans. Beds must be set up and staffed in a unit specifically designated for this purpose.

Occupancy: Ratio of total inpatient days to total bed days in the reporting period. Bed days are the number of licensed beds times the number of days in the period, adjusted for changes in the number of beds during the period.

Open-Heart Surgery Facility: The equipment and staff necessary to perform open-heart surgery.

Organ Transplant: The necessary staff and equipment to perform the surgical removal of a viable human organ, other than the kidney, from either of living donor or a deceased person immediately after death, and the surgical grafting of the organ to the suitably evaluated and prepared patient.

Organized Outpatient Department: Organized hospital services (or clinics) for the provision of nonemergency medical and/or dental services for ambulatory patients.

Outpatient Visits: Visits by patients who are not lodged in the hospital while receiving medical, dental, or other services. A visit consists of one or more occasions of service. Each test, examination, treatment, or procedure rendered to an outpatient counts as one occasion of service.

Pediatric Inpatient Unit: Provides acute care to pediatric patients on the basis of physicians' orders and approved nursing care plans. Beds must be set up and staffed in a unit specifically designated for this purpose.

Physical Therapy Services: Services and use of facilities prescribed by physicians and administered by or under the direction of a qualified physical therapist.

Psychiatric Inpatient Unit: Provides acute care to emotionally disturbed patients, including patients admitted for diagnosis and those admitted for treatment of psychiatric problems, on the basis of physicians' orders and approved nursing care plans. May also include the provision of medical care, nursing services, and supervision to the chronically mentally ill, mentally disordered, or other mentally incompetent persons. Beds must be set up and staffed in a unit(s) specifically designated for this service.

Rehabilitation Inpatient Unit: Provides coordinated multidisciplinary physical restorative services to ambulatory patients under the direction of a physician knowledgeable and experienced in rehabilitative medicine.

Surgical Operations: Those surgical operations, whether major or minor, performed in the operating room(s). A surgical operation can involve one or more surgical procedures, but is considered only one surgical operation.

Swing Beds: Licensed acute care beds designated to be used alternately for acute or skilled nursing care.
